Pride & Trust

The Journey.....

Vintech Polymers Pvt. Ltd., started over 10 years ago when the promoters thought of venturing into labeling industry – taking a big step forward with a vision of unlimited market and limited manufacturers.

Vintech started with a small setup on 5000 sq. ft. land and 8 employees with a capacity of 1 lac labels per day, making “Vintech” – **FIRST** manufacture of Shrink Labels in Eastern India. The dedication of the employees and the enthusiasm of the buyers, motivated the company to grow bigger and bigger with increasing capacities, adding up to the factory area and machineries. Once the mission and the principles were in place, Vintech started hiring more people to execute its vision.

Vintech was the first unit in the flexible printing industry in Eastern India to install a Fully Automatic Register Controlled 10 colour Roto Gravure Printing Press with Turnbar. Little was known that this press would open the doors for more opportunities than imagined, Vintech went ahead to install a Fully Automatic Register Controlled 12 color Roto Gravure Printing Press – again a first in Eastern India.

Vintech continued to invest in manpower, machines and technologies as the sales continued to increase. Today Vintech operates at a capacity of 70 lac labels per day operating 24x7 to meet the customers demand and keep lead times as short as possible. Vintech believes in maintaining a close relation and liaison with the clients for providing complete consumer satisfaction with every product sold.

Vintech is focused on constantly looking out for new emerging technologies and keeps investing in new equipment's and expertise to meet the changing needs of the customers to serve them in the best possible way.

Quality with every run. Served on time.

THE VINTECH ADVANTAGE

Vintech proudly serves brands - big and small, across the country. The shrink sleeves and BOPP Roll on Labels, we produce for our specialty food and beverage and cosmetics manufacturing customers are both aesthetically appealing and functionally versatile. With our unique blend of capabilities and refreshing approach to personalized customer care, we are ready to serve you with:

PRINTING

Upto **12** Colours

PRODUCTION

7 million labels per day

CUSTOMERS

More than **400** Happy Customers

FLEXIBILITY

Short to longer print runs.

VIVID COLOR

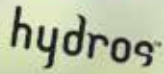

Vivid color and multi-process print production featuring our state-of-the-art color management system.

PERSONALIZATION

Highly personalized printing through Roto Gravure Printing Machines

HEAT SHRINK LABEL (PVC, CAST PVC, PETG)

FULL- BODY LABELS ADD PACKAGING APPEAL.....

Full-body shrink sleeve labels maximize the marketing space on your product which allows for more opportunities to impress your customers. They're extremely effective for adding visual appeal to packaging, thanks to their full-body design, especially when paired with a contoured bottle.

Not only do they offer more graphics coverage than regular labels, shrink sleeves are an ideal choice for products that face humid or moisture heavy environments, such as showers and refrigerators. Since the graphics are printed on the inside of the sleeve, the design won't be damaged regardless of condensation, friction, or rough handling.

Benefits of Full-Body Shrink Sleeve Labels

- Full color, 360° design coverage.
- Fits most containers and can contour to special shapes.
- Moisture and abrasion resistant.
- No adhesive makes containers reusable.
- Glossy, matte, and texture finishes available.

TAMPERPROOF LABELS WITH SECURITY SEALS

Shrink sleeves can also dual perform as a label and tamper-evident seal. All we need to do is add a horizontal perforation near the cap. With shrink sleeves, your time and resources can be saved since you won't need to apply two labels on the same product products.

If you don't want to completely rehaul your labels but would like to protect product contents, an excellent option is to use hologram shrink seals. They work by shrink a strip of film onto the cap and neck of a container to create a seal and typically it's perforated with a 'V' or 'T' cut to allow for removal.

Whether you want a tamper-evident seal or a separate shrink sleeve for products, we can help. Contact us today to learn more!

COMBINE MULTIPLE PRODUCTS WITH SHRINK BANDS

Combination packaging for promotional activities uses shrink bands to package and promote multiple items together as one unit. Packaging different size and shape containers together is simpler than ever with multipack shrink bands. After your promotion is done, any multi-packs left over can be converted back into individual units by removing the bands. Multi-packs are great for packaging multiple products into a single unit which makes for easier shipping, handling, and transportation

BOPP WRAP AROUND LABELS

These labels are wrapped around the bottle/container and are sealed with hot melt glue at the end with the use of a labeling machine. The substrate used is Bi-axially Oriented Poly Propylene, commonly called BOPP.

It is most commonly used for Packaged Drinking Water and Aerated Drinks packaging because of its low cost and high production capabilities when using high-speed label applicator machines. Standard wraparound roll-fed labels are best suited for straight wall cylindrical or square containers, making them ideal for beverage, food and household products.

Wrap around labels can be supplied in Roll/Reel form

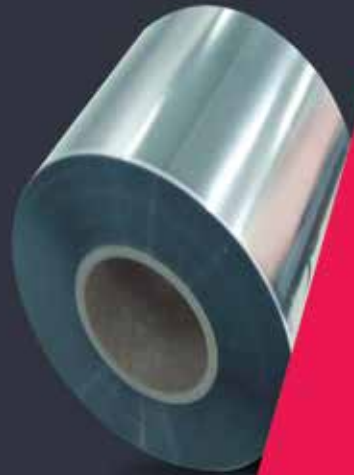

Benefit

- Higher gloss and clarity
- Higher tensile strength that facilitates high-speed labelling
- Greater stiffness
- Excellent printability
- Moisture and abrasion resistant
- Oil, chemical, and acid resistant

PVC LAMINATION FILM

We specialize in offering an excellent array of PVC Lamination Films. These PVC Films are generally used for lamination of mono/corrugated cartons for packaging of automobile parts, electrical parts, toys and games, pharmaceutical products, etc. These PVC Films presented by us are attributed with exceptional glossy finish, elevated strength and transparency. Patrons can avail the PVC Films from us in numerous sizes, colors and thicknesses at the most realistic prices.

Thickness : 3.5 microns to 10 microns.
Available in Clear Transparent and Reverse Printed

Features:

- Brilliant glossy finish
- High strength
- Economical
- Environment friendly

Vintech brand Printed LDPE Shrink Films
for bulk packing of Water & Beverages
has been introduced for the
first time in India.

LDPE SHRINK FILM

LDPE Shrink Film is used in several forms of flexible protective packaging including shrink wraps which performs excellently.

The benefits of using LDPE would be added strength and durability for heavier, larger items, like multipacks for beverages. These wraps are also printable and can have excellent graphics added while shrinking and still maintaining the image and strength required.

Where POF and PVC are limited in gauge, thickness and weight bearing capability, higher gauges of LDPE are the best options.

Fast Facts About LDPE Shrink Wrap

- Low melting point, good stretch & strength - commonly used for foods products and stretch wrapping/palletizing
- Good for lower end applications and unitization (24-pack of Waters & Beverages)
- Durable
- Recyclable
- Half the cost of Corrugated Boxes

PRINTED BOPP SELF ADHESIVE TAPES

Vintech brand Bopp self-adhesive tapes are tamper-proof and are available in a variety of colors, thickness, roll lengths and roll widths. We also can supply custom-printed or signature tapes that can be printed with your company's logo or product name. This not only prevents tempering, it also provides companies a branding opportunity.

Advantages of power band BOPP tapes:

- Superb tack and adhesion to surface
- Strong grip due to excellent adhesive backing
- Quality processing equipment that guarantees consistent quality
- Uniform coating process
- Assured and marked tape length
- Durable
- Long shelf life
- Peak performance even under extreme pressure and temperature conditions
- Custom printed tapes up to 12 colors

PRINTED SELF ADHESIVE STICKER LABELS

Your printed jar labels will be made to any custom shape and size with polypropylene or paper material, food-safe toner and high resolution printing for a superb finish which enhances your brand. Order jar label printing today with low prices and a re-print or refund quality guarantee!

3D IMAGING FOR SHRINK SLEEVES

SEE IT BEFORE WE PRINT

Looking to set your product apart from the competition with an unusual package shape???

Shrink Sleeves from **Vintech** are the answer. Using distortion designing technology the text and images appear correct and proportionate after application is complete. Shrink sleeves can be made to fit any contour of package and are the perfect option for your specifically designed containers. Let our experienced designers help you to design a shrink sleeves solution as unique as the product to which it is being applied.
